

Lx CABLE SYSTEM

Step by Step Component Guide

GENERATION
LIGHTING

Lx Cable System gives users the utmost flexibility to easily design and install customized lighting to meet the specific needs of their space. Simply identify the length of run for which you will need cable, select a transformer and choose the lampping modules best suited for your application.

Our Lx Cable System is uniquely engineered so that you can mix and match any of our lampping modules on the same system. The snap-on design enables quick installation and the ability to adjust over time as lighting needs or preferences change.

1

CHOOSE LAMPS & LAMPHOLDER

Select from a variety of low profile linear lamps and lamp holders that suit your application.

	LED FESTOON	XENON FESTOON	WEDGE-BASED LAMP	HIGH OUTPUT MODULE
FEATURES	<ul style="list-style-type: none"> Up to 80% energy savings over xenon Can be used with existing systems Generates less heat than xenon 	<ul style="list-style-type: none"> Tried and true solution that has proven itself Available in lower color temperature Longer lamp life-span than wedge based 	<ul style="list-style-type: none"> Most economical solution Good lumen output Low color temperatures for candle-light effect 	<ul style="list-style-type: none"> Frosted diffuser that minimizes pixelation even on polished stone counters Available in 2 lengths to fit more spaces
